

Raspberry Pi

USE YOUR LANGUAGES TO SUPPORT LEARNERS AROUND THE WORLD

Become a volunteer translator for us! You will gain new skills and help us put the power of computing and digital making into the hands of many more people.

All you need to start translating our free learning content is: fluent knowledge of English and another language, a few free hours, and an interest in trying out something new.

- ✓ You will get all the tools and support you need from us
- ✓ You will meet hundreds of our volunteer translators online
- ✓ You can start without ever having translated something

Join our global translation community so that together, we can break down the language barriers in computing education.

Find out more at rpf.io/translate today.
